

REMARKS

Claims 1, 15, and 16 have been amended for clarification. The claim amendments find support, for example, by reference to Figs. 1 to 3 of the specification.

As shown in Fig. 1, the fuel cell separator having first and second surfaces comprises a low-elastic modulus layer 1 and a high-elastic modulus layer 2. The low-elastic modulus layer 1 constitutes one surface of the separator. As shown in Fig. 2, low-elastic modulus layer 1 constitutes both surfaces of the separator. As shown in Fig. 3, low-elastic modulus layer 1 constitutes at least a part of one or both surfaces of the separator.

No new matter has been added.

Entry and consideration of this Amendment and early favorable consideration is respectfully requested.

Respectfully submitted,

Abraham J. Rosner
